# PACKARD CATTLE COMPANY

## FELLOW SHORTHORN BREEDERS:

It is certainly with a great deal of enthusiasm and excitement that all of us at Packard Cattle Company enter our first Shorthorn and Polled Shorthorn sale.

It was in May, 1969, that we purchased the Davison Ranch herd and began our quest to make Packard Cattle Company the finest in Shorthorn and Polled Shorthorn cattle. Since that time there have been many changes in the cattle industry, and we have attempted to keep abreast of all of these changes. We have been assisted in our efforts along the way by many people, far too numerous to name individually. But we appreciate their help and sincerely hope all have gained along the way.

We have titled our first sale, "Measure-Up" Sale for several reasons. We believe we have, and will continue to have a group of people and a herd of cattle that "measure-up" to the best.

Too many times all of us can be accused of closing our eyes to other colors and breeds that are either above or below us in the total picture. We can no longer do that. With the rapid improvement of other breeds of cattle and now the tremendous influx of the "Exotics", we can only hurt ourselves by not paying attention and sharing and gaining in the success others are having. We must promote Shorthorn and Shorthorn crosses more vigorously than ever before.

There are approximately 35 million beef cows in the United States, and Shorthorns and Shorthorn crosses can claim a good share of that total. The competition has been tough, but it is going to get a lot tougher.

The new breeds will appeal to cattlemen for various reasons. And even though they do owe part of their blood to Shorthorns, that is not enough. These are different breeds with different associations, and we are going to have to compete with them in every phase of the industry.

A person beginning in the beef cattle industry today has quite a diversified choice of breeds from which he can choose to raise and develop his own herd. For us to believe in our Shorthorn cattle is in itself not sufficient. We have to be able to prove to the beginning breeder that Shorthorn cattle are worthy of consideration — that they "measure-up" to the competition.

We earnestly believe that in this sale we are offering the opportunity to share in our efforts to "measure-up" to our competition. It is not enough to just increase our weaning, yearling, or mature weights; we must make great strides not only to improve, but to surpass our competition. Especially in the case of the younger cattle, we are offering cattle ready to grow and that will continue to grow for several years. We believe we are offering you some of the top females from our herd. We will stand behind these cattle, and we are proud to do so.

March 27, 1972 will prove to be a day worth remembering. We have put forth our best efforts and sincerely hope you will find your trip worthwhile. We encourage you to inspect this sale offering and challenge you to find a superior selection elsewhere.

Sincerely,  
PACKARD CATTLE COMPANY  
W. Guthrie Packard, Jr.

## SALE MANAGERS COMMENTS

### SHORTHORN FRIENDS:

Every Shorthorn breeder who desires to improve his herd owes it to himself to attend this great offering of Shorthorns and Polled Shorthorns. The sale bulls make up the best sale offerings of Shorthorn and Polled Shorthorn bulls in this decade. They are a carefully selected group of bulls that "measure-up". They measure-up in pedigree, performance, size and show ring competition. I have every reason to think they will "measure-up" as breeding bulls.

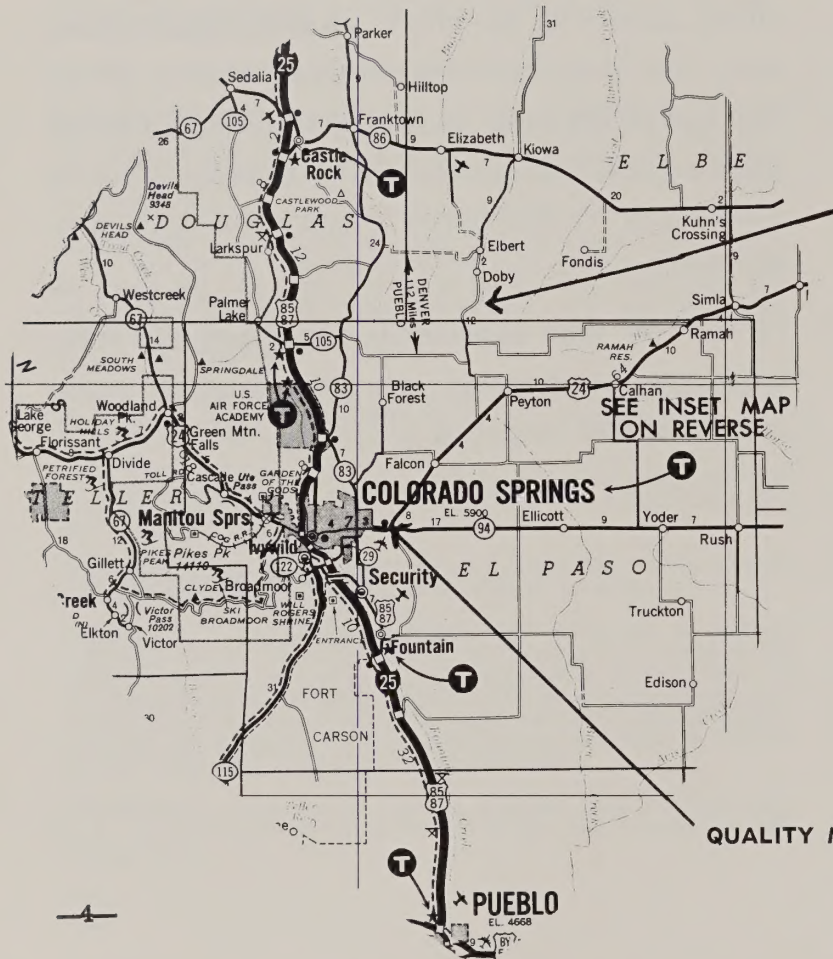

The Packards have spared nothing in building their cow herd and selecting their herd bulls. This

effort, along with the efforts of their capable manager, Jim Shea, accounts for their success today. **You can do the same in your herd through careful selection and improvement.** The only short cut in breeding better Shorthorns is by mating the best to the best.

**Here is your opportunity — March 27, 1972.** Hope you plan to attend. If we can be of any assistance feel free to call on us.

Sincerely,  
Kenneth Holloway
